localhost/fileread.php
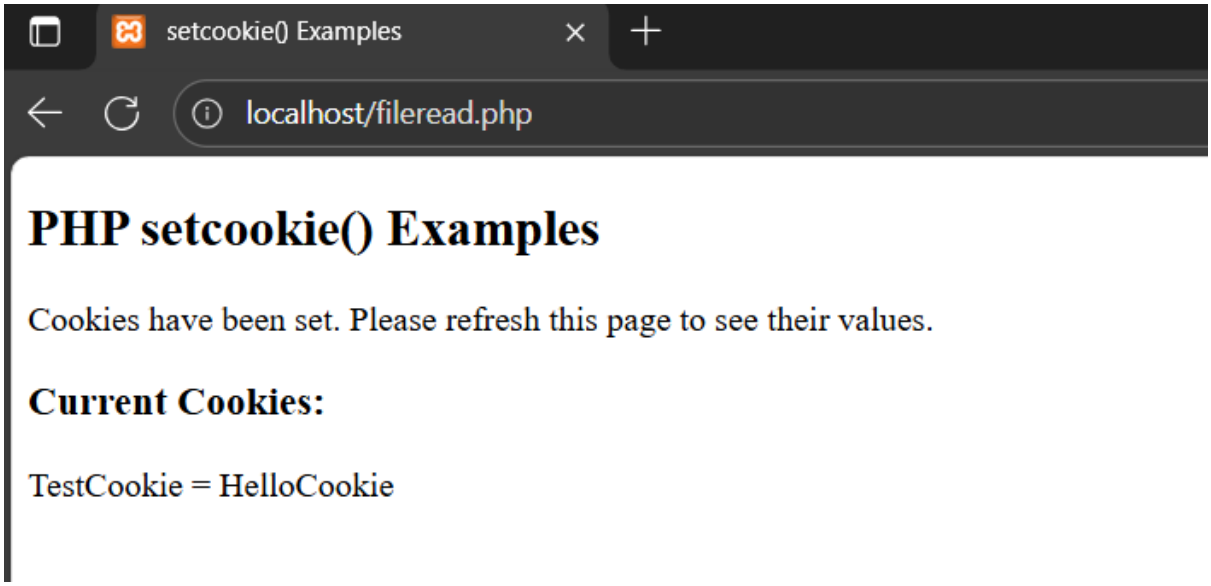
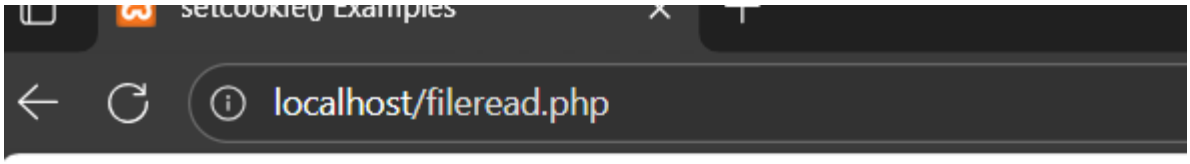
TestCookie Value: HelloCookie

82.





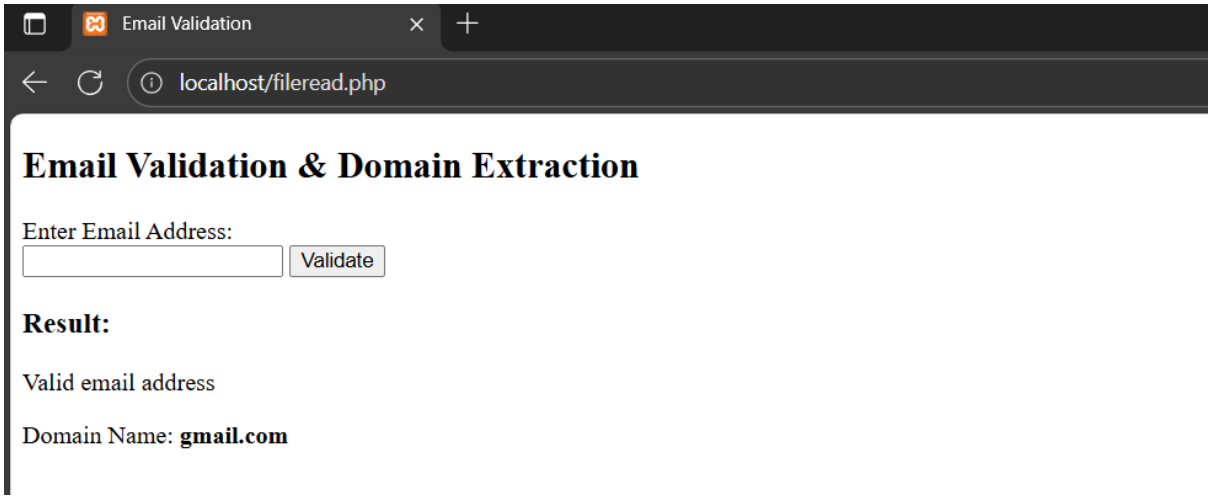
PHP setcookie() Examples

Cookies have been set. Please refresh this page to see their values.

Current Cookies:

TestCookie = HelloCookie
basic_cookie = HelloCookie
hour_cookie = Expires in 1 hour
path_cookie = Site-wide cookie
domain_cookie = Domain specific cookie
secure_cookie = SecureData

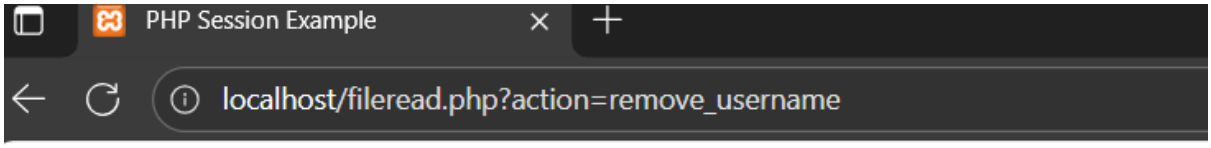
83.



Email Validation
localhost/fileread.php
Email Validation & Domain Extraction
Enter Email Address:
Validate
Result:
Valid email address
Domain Name: gmail.com

84.

PHP Session Example
localhost/fileread.php?action=set
Session Handling Example
Set Session Values | Remove 'username' | Destroy All Sessions
Current Session Data:
Array
(
[username] => Dhanuja
[email] => dhanu@example.com
)



Session Handling Example

Set Session Values | Remove 'username' | Destroy All Sessions

---

Current Session Data:

```
Array
(
    [email] => dhanu@example.com
)
```

PHP File Functions Demo
File size: 443 bytes
Using fread():
A computer is an electronic device that processes information by following a set of instructions, called programs. It can perform tasks such as storing data, performing calculations, and communicating with other devices at high speed and accuracy. Modern computers are used in almost every field — from education and business to healthcare and entertainment — making them an essential tool in our daily lives.
